PROFILE

I am Sajin Mahmud Arpon, a Computer Science and Engineering graduate from American International University-Bangladesh with a strong focus on machine learning, NLP, and full-stack web development. Through diverse academic and personal projects, I have applied advanced ML techniques to real-world challenges, from misinformation detection to ethnic language recognition. Passionate about innovation and problem-solving, I aim to contribute globally by building intelligent, impactful digital solutions while continuously expanding my technical expertise.

EDUCATION

American International University-Bangladesh

Dhaka, Bangladesh

Bachelor of Science in Computer Science and Engineering(CGPA-3.53)

2022 – 2026

Abdul Kadir Mollah City College, Narsingdi

Narsingdi, Dhaka

Higher Secondary in Science

2020

SKILLS

Technical: Python, HTML, CSS, PHP, MySQL, MSSQL, OOP, Tensorflow, Keras, Seaborn, Machine Learning, NLP.

Tools: VS Code, Visual Studio, Google Colab, RStudio, Overleaf, LaTeX, Git, GitHub.

PROJECT EXPERIENCE

Applying Zero-Shot for Combating Misinformation, Academic Project

05/2025-06/2025

- Implemented a zero-shot fake news detection using multiple transformer models and ensemble them for better performance.
- Utilized DeBERTa, BART, ModernBERT, and CE-DeBERTa for modeling; applied PyTextRank and spaCy for text summarization.
- Paper link: <https://ieeexplore.ieee.org/document/11381825>

Bangladesh Ethnic Language Recognition, Personal Project

08/2025-11/2025

- CNN based system to recognize and classify Ethnic language, contributing to digital preservation of linguistic diversity and cultural heritage.
- Character based tokenization was applied for preprocessing and then for the classification CNN model was built with 1D convolution.

NLP-Based Sentiment and Topic Analysis of Anime Reviews, Academic Project

12/2024-01/2025

- Revealed genre-specific emotional trends and audience engagement patterns through statistical modeling and text mining techniques.
- Applied R language with LDA topic modeling and NRC sentiment lexicon, incorporating a wide range of preprocessing techniques for text analysis.

Library Management Web Application, Academic Project

06/2024-07/2024

- Developed a full-stack library management system with user authentication, book tracking, due date monitoring, reservation features, and an admin dashboard for managing borrow history and catalog updates.
- Built a full-stack web application using PHP, HTML, CSS, and MySQL with user authentication, responsive design, and database-driven features

Anyone for Tennis, Personal Project

11/2024-12/2024

- Developed a C# Windows Forms application for tennis club management, integrating coach, schedule, and membership databases with role-based access, real-time scheduling, profile editing, and member enrollment features.
- Built using C#, Windows Forms, .NET Framework, SQL Server, and Visual Studio.

My Portfolio, Personal Project

08/2025-ongoing

- Built a dynamic, visually rich portfolio showcasing design precision and technical depth.
- Developed using HTML, CSS, JavaScript, and integrated ML/NLP project highlights with modular architecture.
